## **Kirby® introduces new Gree and Lennox chillers**

**Kirby has introduced the new Gree D-Series and Lennox eComfort chillers to their portfolio, increasing the range of chiller options now available.**

The Gree D-Series chillers are suitable for new builds or retrofit to existing buildings such as hotels, apartments, restaurants, office buildings, shopping malls, theatres, gyms, workshop and hospitals. Models range between 65kw and 249kw, with their modular design also allowing grouping of different units to achieve the required duty. Combine up to 16 of the 65kW and 80kW models, or 8 of the 130kW, 160kW and 249kW models to achieve a massive 1,990kW of cooling capacity. Furthermore, Gree D-Series Chillers are reverse cycle and can be used for cooling in summer and heating in winter.

Adding to the existing Lennox Ecolean and Lennox Neosys ranges, Kirby now also offers customers the new Lennox eComfort range. With a compact, low profile and good architectural integration, these chillers are perfect for commercial offices, data centres, hotels, hospitals, shopping malls, non-food retail and process cooling.

Eurovent certified, the Lennox eComfort delivers high efficiencies all year round, exceeding European Energy Efficiency 2021 Requirement (ErP). They also deliver some of the lowest sound levels on the market thanks to A3S Active Acoustic Attenuation.

To complement the chiller offer Kirby is also equipped with Lennox Aqualean water source packaged units; Kirby glycol evaporators; refrigerant; and even OEM and replacement coil products. And, with a wealth of industry experience, a team of dedicated Field Engineers are on hand to assist with any selection enquiries.

Contact Kirby on 13 23 50.
