

Kirby® Guardian Ready Connect Evaporators

Kirby Guardian Ready Connect represents the next release in the Kirby Guardian family of evaporators, standing alongside Guardian and Guardian Ultra.

Kirby Guardian Ready Connect evaporators are factory fitted with Carel's EVD ice control solution for ExV proportional electronic expansion valves directly on the evaporator, with a revolutionary design intended specifically for low temperature conditions.

The range delivers considerable benefits for contractors and asset owners alike in delivering a more efficient refrigeration system with reduced energy consumption.

Other features include, simple and fast installation and commissioning, improved pull-down times, precise refrigerant flow, enhanced durability rated to IP65 and operating conditions between -30°C to 40°C.

Carel EVD ice is also designed to be compatible with third party regulation and control solutions, using standard communication protocols, or can work as a standalone solution for refrigeration cells and other applications in which compactness and versatility are key.

Kirby Guardian Ready Connect delivers all the performance benefits available without the need for cabling, welding or complex configuration. The range also offers the quality and reliability of a factory tested and installed solution, backed by the combined knowledge and strength of both Kirby and Carel.

For more information contact Kirby on 13 23 50.
