## Beijer Ref acquires Armcor Air Solutions

---

**In a move that further diversifies Beijer Ref's portfolio within Australia, we are pleased to share news of the 100% acquisition of Victorian based climate and ventilation solutions business, Armcor Air Solutions.**

The acquisition allows Beijer Ref to strengthen its ability to provide a complete suite of HVAC equipment, extending on the wide residential and light commercial packages currently being offered through its wholesale businesses. It also provides Beijer Ref with new competencies and access to a segment that they have not been present in, until now.

Armcor Air Solutions is a specialist in energy efficient fresh air solutions and energy-recovery systems and will be well supported by Beijer Ref's local and international expertise and continued investment in advancing environmentally friendly solutions across evolving market segments.

Beijer Ref welcomes into the group a committed team and highly regarded business that features a local manufacturing facility and 37 staff based at the company's main facility in Broadmeadows, Victoria.

Armcor Air Solutions will continue to operate under its current structure and under the direction of Kirby Sales and Marketing Manager Brett Hedge.

Wayne Ferguson, Managing Director Beijer Ref Australia, comments:

"This acquisition is one that is very exciting for Beijer Ref Australia as we take on a successful family operation to build on its capabilities and extend its compelling product offer to more customers nationally."

### About Beijer Ref

Beijer Ref AB is the world's largest global refrigeration wholesaler with some 70 subsidiaries in Europe, Asia Pacific and Africa. The Group of companies provide a wide range of products covering commercial refrigeration, industrial refrigeration, air conditioning and heating to customers all over a large proportion of the world.
