

Price Changes / Product Availability – January 2022

To our valued customers,

We are receiving significant price changes in components and finished goods from our supply partners and manufacturing facilities. This is largely due to ongoing volatility in material cost and availability along with increasing charges in logistics and freight.

We will be taking action to adjust list and net pricing and note that this will impact several product ranges available through Kirby including Refrigerant, Refrigeration Equipment and various parts categories.

Alongside price changes we are continuing to see increased demand and some constrained supply on a number of product lines. To avoid disappointment, we recommend that early ordering be considered wherever practical for your project needs.

Price changes will come into effect on the 3rd of January 2022 and we encourage all customers to contact your sales representative for more details and/or access your updated 'Net' and 'List' pricing via Kirby smart@ccess.

All customers can gain access to our smart@ccess portal by registering online https://smartaccess.kirbyhvacr.com.au/account_application.php

It is important to note that Kirby proactively reviews prices and publishes non-commodity pricing changes via our website; <https://www.kirbyhvacr.com.au/newsroom/price-notifications>

Kind regards,

Brett Hedge
National Sales & Marketing Manager
