

Refrigerant Price Change – 20th January 2020

To our valued customers,

We would like to advise that there will be a change in refrigerant pricing effective 20th January, 2020. The changes come as a result of supply chain costs and the changes will vary dependent on the refrigerant type.

To support our customers, Kirby has ranged a number of alternative refrigerants and technologies with a focus on lower GWP solutions.

These refrigerants are specifically suited to commercial refrigeration and air conditioning systems. These refrigerants are designed to provide a lower total cost of ownership and offer our customers and end users viable alternatives for use through the HFC phasedown.

For more information we request that you speak to your local Kirby representative to get an understanding of these refrigerants and equipment solutions.

We encourage customers to access their updated 'Net' and 'List' pricing via Kirby smart@ccess and/or make contact with their sales representative to get the details on the changes as they are available.

All customers can gain access to our smart@ccess portal by registering through www.kirbyhvacr.com.au or making contact with your local representative.

It is important to note that Kirby proactively reviews prices and publishes pricing changes via our website; <http://www.kirbyhvacr.com.au/en-nz/newsroom/price-notifications>.

Kind regards,

Brett Hedge
National Sales & Marketing Manager
