

A RICH AND DIVERSIFIED HISTORY

Kirby has a rich history in Australia spanning over 95 years since James N Kirby commenced business operations in Sydney. Over the years, the Kirby name has touched millions of Australians in a variety of different applications.

The Kirby Timeline

Experts in Air Movement

Whilst most know Kirby as a market leading and well respected commercial refrigeration brand, the Kirby name is also synonymous with heat exchange and air movement, underpinned by a proven history of quality, reliability and performance in both refrigeration and human comfort applications.

The strength of our reputation is the result of over 95 years experience in design and engineering based on local market demands and customer needs. Our standards are high and we are diligent in sourcing leading technology and components to complement the Kirby name.

Kirby is – Strength, Reliability and Performance

Continued Support for Today and the Future

The KirbyAir™ Compact High-Efficiency Gas Furnace has been designed to provide optimal human comfort in an efficient manner using a trusted energy source. Offering a 4.5 – 4.8 star rating, it delivers the ideal balance of temperature and humidity in every room of your home. When compared to electric heating, the warmth from natural gas is not as drying and keeps you warmer in winter.

Also, the KirbyAir™ Compact High-Efficiency Gas Furnace can be coupled with optional Lennox add-on cooling to provide an all-year round solution and is supported by the same Dealers that offer sales, installation and after-market support for Lennox products across Australia.
