

Commodity Price Changes – January 30th, 2026

To our valued customers,

Please be advised that there is continued pricing volatility in commodities and we are experiencing market-wide increases in the price of copper and silver solder.

Our commodity pricing (Copper, Paircoil, Solder, Refrigerant) is reviewed on a regular basis and may change without prior notice.

There have now been six months of consecutive increases in Copper pricing and the most significant impact has been through the last two months.

As a result, Copper, Paircoil and Solder will be increased immediately and many components containing copper / brass in their manufacture will experience increased prices over the next few months.

Quotation validity terms have now been revised. For commodity products, previously quoted prices may not be able to be honoured. Customers are encouraged to stay up to date using Smart Access for all your product and pricing information and the latest notifications from Kirby. We appreciate your ongoing business and support.

Best regards,

Brett Hedge - General Manager
