

29 April 2026

PVC and K-Flex Price Notification

To our valued customers,

Per our communication earlier in the month, we have continued to see volatility in global raw material markets — particularly sustained increases in petrochemical, oil and rubber-based products.

As a result, effective 1 May 2026, pricing for PVC pipe and K-Flex insulation products will increase by approximately 24%–26%.

We understand that price increases can be challenging and want to assure you that this decision has been made only after careful consideration. Our priority remains providing you with reliable products, outstanding service and competitive market pricing.

If you have any questions or would like to discuss how this change may affect your account, please contact your local representative.

To view your updated pricing, please log in to smart@access, our online customer portal. We appreciate your ongoing business and support.

Kind regards

Louie Delinicolis
